

# Galactic Easter Eggs

Enjoy making these out-of-this-world Easter egg craft using a variety of recycled and household materials.

## Materials:

- Aluminum foil
- Cardboard (cereal box, shipping box, etc.)
- Coloured permanent markers
- Collection of buttons, pipe cleaners, or other items on hand
- Scissors
- Glue
- Egg shape cut-out (optional)

## Instructions:

1. Trace an egg shape directly on a cardboard surface to make the base of your Easter egg.
2. Cut the egg shape and measure a sheet of aluminum foil that will cover the entire surface.
3. Apply glue to the egg cut-out, then adhere the aluminum foil to the egg. Make sure to press evenly across the egg to avoid any bumps or air pockets. Fold any remaining foil to the back and add more glue if needed.
4. Use your coloured markers to decorate the egg.
5. Display your galactic Easter egg by hanging it with string or taping it to a wall for everyone to see!
